Other exhibits of the Museum of Man
will be open for you to tour.

A wide selection of hors d'oeuvres
and desserts will be served
(Dietary laws observed)

Complimentary valet parking
Business attire
Please call if you need a ride

Journey to the Copper Age

tells the story of the profound
changes that metallurgy brought to
human society: the birth of
Mediterranean farming, the creation of
the first temples and cemeteries, and
the emergence of complex societies.

The exhibit includes magnificent
artifacts traveling outside of
Israel for the first time.

Thomas Levy,
PhD., UCSD
professor and
leading expert on
the Chalcolithic
period in the
southern Levant,
will be leading
tours and sharing
his expertise at
the celebration
on May 31st.
